Product Name : Food Hot Ink Rollers	**Product Code :** MACHEQ-F-M9801077

Description :

Food Hot Ink Rollers

Technical Specification :

Roller Surface Ink Roll
Usage/Application Printing Industry
Roller Work Nature Inking Roller
Packaging Carton
Roller Length 0-100 mm

The ink in the hot ink roller is solid at room temperature and does not smudge. It is non-toxic, gives sharp impressions and contains solvent free ink and therefore there are no hazards possible as in the conventional ink. They are used in high-speed code date marking equipment in a wide variety of industries such as food industry, Pharmaceuticals, dairy, frozen food etc. They are made in sizes to fit all models of hot ink roller machines (such as Markem® or Norwood®).

Specifications:

- PP,PE,PET,PVC material
- Coding temperature
- High temperature 140~180
- Middle temperature 120~150
- Low temperature 90~130
- Height(mm): 12, 16, 32, 36, 40, 48, 60
- Outer Diameter(mm) : 32, 36, 40, 48

- Inner Diameter(mm) : 11, 12
- Colours available Red, Green, Blue, Black, Yellow, White
