Product Name :
Spot Welding Dent Pulling System

Product Code :
MACHEQ-A-M11801001

Description :

Spot Welding Dent Pulling System

Technical Specification :

| | |
|-------------------|----------------|
| Input Voltage | 220V/380V |
| Input Power | 22kVA |
| Input Current | 58A |
| Output Voltage | 6-12V |
| Welding Thickness | 0.8+1.2mm |
| Duty Cycle | 35% |
| Dimension | 600x470x960 mm |
| Weight | 68 kg |

Easy moving and operating; esthetical design; high power output; functions such as vertical pulling, heating/contract sheet plate, spot welding, stud, plate cutting, meson, flatten etc.

Achieve the best welding result by micro processor control, advanced digital control tech, and special personalize design due to choose the suitable welding strength.

Features:

- Voltage monitor automatically.
- Over-heat protection.
- Adopt curve silicon steel chip and relay
- Adopt precise time adjustment system.

-
- Various pulling power devices and different welding torches.
 - Without dismantling the vehicle.it is the most ideal and necessary equipment for auto maintenance.
