Product Name :
Battery Analyzer

Product Code :
MACHEQ-A-M13201001

Description :

Battery Analyzer

Technical Specification :

Application	Industrial Use
Working Temperature	-40 Degree C to 70 Degree C
Voltage Range	2.0-30VDC
Display	Digital

Introducing the series from Midtronics, worldwide leader in battery and electrical diagnostics. The new series combines over 20 years of experience and innovation gained from selling essential tools to nearly every car and truck OEM in the world, with the industry standard conductance technology for battery testing, which makes testing safe, fast, and simple. SAFE to use anywhere, even in front of the customer FAST and accurate testing of the battery or electrical system in seconds SIMPLE, proven user interface eliminates guesswork and user error to provide an accurate analysis every time.

The Series advanced features include: Multiple vehicle applications, battery types, and rating systems Large back-lit screen and improved user interface Integrated printer option Improved Removable Cable Design Which helps to: Save time and money by improving battery and electrical diagnostic productivity Improve customer service by reducing wait time Increase sales by pro-actively testing batteries and electrical systems Increase customer satisfaction by identifying potential problems before they occur
