

Product Name :
Agricultural Disk Plough**Product Code :**
MACHEQ-A-M5401009**Description :**

Agricultural Disk Plough

Technical Specification :

- it is a plough which cuts turns and in some cases breaks furrow & like by means of separately mounted large steel discs.
- A Disk Plough is designed with a view to reduce friction by making a rolling plough bottom instead of sliding Plough Bottom.
- A Disk Plough works well in the condition Mould Board Plough does not work satisfactory.
- It is more useful for deep ploughing
- It can be used to stony and stumy soil without much danger of breakage.
- It works in loose soil also also (such as peat) without much clogging.
