Product Name :
Food Frozen Meat Block Cutter

Product Code :
MACHEQ-F-M3201019

Description :

Food Frozen Meat Block Cutter

Technical Specification :

These include the machine's stop when the cover of the rotor is raised and also when the 200lit bin used for collection of meat flakes is removed under the rotor. In case of an emergency the machine brakes instantly mechanically and electrically using a "DC Braking System". Specially designed bearings absorb the high loads produced during the machine's operation and a "soft starter" system protects the motor's operation and prolongs its life cycle. The machine is entirely made of stainless steel and it is electronically controlled. With the aid of the pneumatic feeding system, it is capable of high production levels.

Completely stainless machines.

Simple lines and smooth surfaces to facilitate cleaning.

Motors protected against heat and over-intense operation.

Operating voltage : 24 V.

Press-button controls with IP66 protection.

Motor: 9.5 Kw

Air Pressure: 6 bar

Productivity: 2000-2500 Kg/h

Temperature of Meat: -15° C up to -18° C

Length – 210cm

Height – 130cm

Width – 107cm
