Product Name :
Garage Workshop Gas Analyzer

Product Code :
MACHEQ-G-M4901010

Description :

Garage Workshop Gas Analyzer

Technical Specification :

Fuel Selectable
NDIR Detector measures CO/CO2/HC, and electro chemical sensor measures O2, NOx
OIML Class I & Bar 90 compliant
Uniquely designed bench, Patented in Korea,
Chinese Patent pending
Leakage check
HC Residual Check
Self Diagnosis

Usage/Application: PUC
Product Type: ANALYZER
Power Supply: 230
Features: LCD
Analysis Time: 3SEC
Warm Up Time: 5MINS
Color: CREAM
Automation Grade: Automatic
Display Type: LCD
Response Time: 4~5 sec. (more than 90%)
Phase: SINGLE
Weight: 5KG

Power: 230
Temperature: 55
Fast Warming Up: Less than 5 min
Operational Temperature: 0-40 Degree C
Frequency: 50/60Hz
