Product Name :
Gravity Paddy separator Rice separator Grain separator

Product Code :
MACHEQ-A-M5331002

Description :

Gravity Paddy separator Rice separator Grain separator

Technical Specification :

Separator is designed based on the principal of different gravities on paddy and brown rice, through back and forth moving sieve plate, to separate the paddy and brown rice from the mixture. Paddy separator greatly improves the rice separation rate.

Features

Compact structure, convenient operation.

Suitable for selecting either the long and short rice by a great adaptability, and high efficiency.

Low mechanical gravity center, well-balanced, fitted rotation speed, stable and reliable mechanical performance.
