Product Name :
Oil Extraction Press Machine

Product Code :
MACHEQ-A-M5371001

Description :

Oil Extraction Press Machine

Technical Specification :

Palm oil press is a special product developed for palm oil extraction from palm fruit. Its main features are large processing capacity, long press stroke in the pressing chamber with higher pressing pressure, to improve the oil output efficiency for high extraction rate; at the same time, the consumption parts are made of high-quality alloy steel and forged by special heat treatment process, significantly expands the service life. It is not only suitable for the pressing of palm oil and coconut, but also for the pressing of various common vegetable oils such as rapeseed, cottonseed, soybean, peanut, flax seed, Paulownia seed and sunflower seed. It has the advantages of low investment, large output, easy maintenance and wide adaptability, and is suitable for medium and large oil processing plants.

Item	Raw material processing capacity (t/24h)	Residue oil content in fibers after pressing (%)	Oil pressing rate (%)	Power consumption (kW.h/t)
Palm oil	15	8	70	55
Coconut	15	8	70	55
Rapeseed	20	7.4	84	34

Cottonseed	20	6.3	80	54
Soybean	18	6.2	69	51
Peanut	20	6.3	92.5	34
