

Product Name :
Fireproof Resistant Emergency Silica Gel Fire Blanket

Product Code :
MACHEQ-F-M6621001

Description :

Fireproof Resistant Emergency Silica Gel Fire Blanket

Technical Specification :

Size	1m*1m 1.2m*1.2m 1.5m*1.5m 1.2m*1.8m 1.8m*1.8m 2m*2m
Thickness	0.45±0.03mm 0.8mm±0.03mm
Material	The fireproof blanket is made of special fireproof fiber cloth through special processing
Feature	Extinguish fire sources and prevent sparks from splashing
Application	In addition to the gas welding, gas cutting and other construction site on the surrounding coverage of flammable and explosive materials, but also directly used in a variety of heat equipment and heat conduction system as wrapping insulation material
Fire extinguishing principle	To extinguish a fire by placing a blanket over a burning object, depriving it of oxygen
Cover the fire source and block the air so as to achieve the main use place of	Fire blanket is mainly used in enterprises, shopping malls, ships, cars, civil buildings and other occasions as a simple initial fire extinguishing tool. Especially suitable for family and hotel kitchen, hotel, entertainment places, gas stations and

fire fighting

other places easy to fire. To prevent the spread of fire and escape protection
