Product Name :
Food Processing Shuttle Conveyor

Product Code :
MACHEQ-F-M2631004

Description :

Food Processing Shuttle Conveyor

Technical Specification :

Automatic shuttle conveyor through the reciprocating movement of the conveyor belt, can make the direction of the right Angle change, according to the production demand from a row of conveyor into several or more columns to improve production efficiency when connect with patty forming machine and swinging plate machine.

Belt width: 200mm,300mm,400mm,600mm

Belt speed: 3~15m/min

Power: 380V/50Hz,3P415v,220v,3p

Input height: optional

Output height: Optional
