Product Name :
Scissor Lifter

Product Code :
MACHEQ-A-M3531001

Description :

Scissor Lifter

Technical Specification :

Scissor type car elevator is used for cargo transport special hydraulic lifting platform, mainly used in warehouses, garages, workshops and other working layer up and down cargo transportation, has a wide range of applicability, carrying capacity, lifting safety and stability, simple and convenient installation and maintenance, is economic and practical ideal cargo transportation equipment.

Alignment scissor lifter feature

On-ground mounting, with rolling jack.

Adjustable worktables and platforms with front recesses can accommodate different kinds of wheelbases and wheel tracks.

24V safety operating voltage.

Pneumatic lock release

Steel plate scissors which has good resistance to deformation

There is no oil bearing inside rolling axis parts makes small noise.

Relief valve built in power pump to prevent overloading.

Lifting capacity: 4000kg

Lifting height: 1700mm

Secondary lifting height: 450mm

Lift time: Up 60s down 50s

Length of the platform: 600mm

Motor power: 220V/380V 2.2kw

Hydraulic oil: 220kg/cm

Air pressure: 6-8kg/cm
