Product Name :
Hydraulic Four Post Lifter

Product Code :
MACHEQ-A-M3531004

Description :

Hydraulic Four Post Lifter

Technical Specification :

Capacity:30T

Lifting Height:15000mm

Motor Power:3*4

Weight:4.8T

Input Voltage:380V

Hydraulic Four Post Lifter lift is a lift machine that lifts the whole vehicle by lifting the front and rear Bridges or beams of the car.

The main feature of this kind of hydraulic four post lifter is equipped with special supports or brackets to support the front and rear Bridges or beams. The axle lifting equipment is generally composed of more than one independent lifting device, which can be made fixed or mobile.

Electric-hydraulicdrive.

Automatic safety locks,use more safety and reliable.

Independent hydraulic cylinder,needn't routine maintenance,remove convenient,easy use.

Mechanical process of post orbital at one time,high strength,can be used longer.

Special chain drive mode,large anti-extension power,to make sure the safety of user and machine.

Lone platform is optional for diffent kinds of vehicles.

Capacity	Lifting Height	Motor Power	Weight	Input Voltage
20T	1500mm	2.2 *4	4T	380V
30 T	1500mm	3*4	4.8T	380V
