Product Name :
Vertical Brake Drum Cutting Machine

Product Code :
MACHEQ-A-M3551003

Description :

Vertical Brake Drum Cutting Machine

Technical Specification :

Brake drum cutting machine is The main characteristics of the machine all operations are controlled by computer.

The spindle adopts advanced frequency conversion speed regulation, which can achieve 30-130r/min stepless speed regulation.

All speed regulation is only controlled by a knob, and the spindle speed can be changed without stopping the machine.

Wide base design is adopted, and the machine has strong rigidity. Spindle setting is equipped with chuck, so that you are very convenient and practical when setting brake drum.

Cutting diameter: 200-700mm

Max. Cutting depth: 320mm

Spindle speed: 30-130r/min(stepless regulating

Feeding speed: Fast 0.30 mm/r

Feeding speed: Slow 0.20mm/r

Motor: 380V 2.2KW 50-60HZ
