Product Name :
Auto Workshop Hydraulic Car Washing Ramp

Product Code :
MACHEQ-A-M3501003

Description :

Auto Workshop Hydraulic Car Washing Ramp

Technical Specification :

Hydraulic car washing lift.

autone has been successful in making and supplying grade one quality car washing lifts which way apart from the conventional single post lift the single post lift uses 105 litre oil, the single post lift requires 5hp compressor and above all it needs a strong concrete foundation for installation, which makes the single post lift very very costly and difficult to install and dismantle.

apart from this autoone has developed hydraulic scissor lift for washing which doesn't require any foundation and the lift works with single phase supply without a compressor with just 10 litre of hydraulic oil.

the lift comes with all safety features and other system to do the operation very smoothly and efficiently. it is much much cheaper in terms of price and maintenance.

Type	Double Cylinder Hydraulic Lift
Lifting Capacity(kg)	4000
Maximum Rise(m)	5-10
Min Lift height (Minimum)	1ft
Number of Stopping Positions	2-4
Max Lift height (Maximum)	4.75ft
Maximum Load(kg)	4000
Product Type	lift

Number of Guide Posts	2 Post
Design Type	scissor
Compressor Type	230
AMC/After Sales Service available	Yes
AMC/After Sales Service	Provided
Installation Provided	Yes
Warranty	12 months
Locking System	Manual Lock
Color	red
Material	Stainless Steel
Capacity	4 ton and 8 ton
Motor	2.0/3.0 hp
Lifting Time	45 Seconds
