**Product Name :**  
Auto Workshop Portable Low Rise Lift

**Product Code :**  
MACHEQ-A-M3501022

**Description :**

Auto Workshop Portable Low Rise Lift

**Technical Specification :**

This is a revolutionary vehicle lift first time in China. this a car jack that weighs this lift when flat has a minimum height of only, this allows the user to slide the lift under any kind of vehicle even having lower wheel base. this carjack can be used on a perfectly levelled ground, which allows the user to make repairing bays anywhere in the workshop as per their convenience. This lift is actually like when lifted from middle of the vehicle and the user can work either on front or the rear of the car at his convenience.

It is made of a precision material which makes it to lift heavier load though the actual weight of the lift is only 65kg also perfect special welding makes it more stronger and this feature makes it portable with the help of 3 wheels. This lift uses gear system which are made with cutting edge technology with antiskid device and locking system which makes it most safest lift. most suitable for all kind of workshop, tyre shop, suspension jobs, Engine work, denting work etc

All these features make it most versatile lift. this carjack100 can be lifted manually or with help of a Drill machine and hence makes it maintenance lift.

Body Material	Stainless Steel
Usage/Application	Servicing
Locking System	Manual Lock
