Product Name : Food Flour Packaging Machine	**Product Code :** MACHEQ-F-M3301019

Description :

Food Flour Packaging Machine

Technical Specification :

Flour packaging machine suitable for all kinds of bottled, canned, bagged quantitative filling. It can be filled with 5-5000 grams of powder, no need to replace equipment, just need to replace the spiral fittings.

The Flour Packaging Machine is composed of a bag sealing, filling and packaging machine, a weighing equipment and finished product output equipment, which can automatically complete the work of weighing, cutting, packaging, sealing, printing and spraying of flour. It has the characteristics of high precision, stable performance, and simple operation, and the workers can use it after simple training. Compared with ordinary product on the market, it is also available of high speed operation and there is no special need of maintaining.

The Flour Packaging Machine is suitable for the packaging of flour. Other similar materials need simple improvement before they can be packaged. The automatic machine is specially designed for various food powder packaging, beautiful packaging, high precision and fast speed. The main packaging materials are composite belly, non-woven fabric, paper and plastic film, which are bonded at high temperature The automatic flour packaging machine can automatically complete the functions of measurement, filling, bag making, sealing, cutting, counting, printing date and so on.
