These coders are ideal for On-Line High Speed Coding on packaging machines or bottles moving on conveyor.

The message to be printed is very easily composed on its graphic display using the integrated complete QWERTY keyboard. The message can be upto 4 lines with a combination of small, medium or large characters from 1 mm to 17 mm in height along with LOGOs.

The Inking system consists of a simple disposable pre-mix ink cartridge using fast drying & indelible solvent-based inks (for porous and non-porous surfaces) which is just push fitted into its SLOT & immediately you can start printing.

The small print head is then placed aligned with the object or substrate & whenever the product sensor gives a signal, the whole message is spray-printed onto the substrate while it is in motion without touching it.
